# Face-to-face training on climate services reaches 106,000 farmers in Rwanda

## THEME

Climate services and safety nets

## GEOGRAPHIC FOCUS

East Africa

The Rwanda Climate Services for Agriculture project supported the Twigire Muhinzi agricultural extension service to scale up the Participatory Integrated Climate Services for Agriculture (PICSA) approach **in 27 of Rwanda's 30 districts, facilitating 106,000 Rwandan farmers to understand and act on climate information.**

Climate service delivery was deepened through the launch of 225 Radio Listening Clubs that convene PICSA participant farmers to listen to and discuss bi-weekly climate services radio broadcasts, take turns participating in call-in shows, and provide input to future programming content.
